Subject: Stop!

Gary Hartman:

National Security Complex! Some name that is.

The world needs bombs refurbished for longer shelf life and a new 4 billion dollar bomb plant like we need holes in our heads. Only, with this kind of strategy, the people of the world are likely to have no heads in which to put the holes.

For God's sake, stop making bombs altogether, before it is too late.

Ann Horn

Comment No. 1

Issue Code: 16

Comment noted. In accordance with Section 91 of the *Atomic Energy Act*, DOE carries out its mission (i.e., atomic weapons activities) consistent with the consent of and direction from the President and Congress. This consent and direction are contained in the Nuclear Weapons Stockpile Memorandum, which is updated annually. The issue of whether DOE should produce nuclear weapons or alternative uses of the Nation's funds are beyond the scope of the Y-12 SWEIS.
